EXPERIENCE

Plásticos Duralón — Dominican Republic
Software Engineer — *Apr 2026 – Present*

- Built the B2B ordering channel (iOS, Android, and web) connected to the ERP: 1,238 customers moved to the digital channel, ≈RD$120M (≈US$2M) processed, and 0 stuck orders thanks to retries and idempotency.
- Digitized injection-molding quality control (Calidad App) with Zebra devices and a real-time dashboard: 2,724 samples recorded, 38 machines with traceability, and weekly usage up 25x.
- Built JF Producción, which unifies ERP, plant, and management data: 1,510 duplicate orders merged, 5,919 materials corrected, and catalog mismatches reduced from 4,630 to 1,077.
- Implemented a raw-material WMS with QR traceability from receiving to the machine, batch blends, and requisitions (web and Android).

RiserUP — Remote
Software Developer — *Feb 2025 – Mar 2026*

- Developed AI integrations and process automations, streamlining workflows and reducing operating time.
- Implemented automation solutions with modern tools, improving the efficiency of internal teams.
- Contributed to APIs and backend services, ensuring integration with external platforms and AI models.

Paredes Law Office — Dominican Republic
Software Developer — *Oct 2022 – Jan 2025*

- Took part in architecture design, code reviews, and technical decisions, improving software quality and maintainability.
- Optimized key algorithms and processes, contributing to a more efficient system.
- Set up and managed CI/CD pipelines, automating deployments and tests to reduce production errors.

Fumigadora El Cacique — Santo Domingo, DR
IT Support Technician — *May 2019 – Sep 2022*

- Supported a small team of users, keeping daily operations running.
- Implemented backup and maintenance practices that helped prevent recurring failures.
- Trained staff on business software, improving the efficiency of their work.

EDUCATION

Instituto Tecnológico de Las Américas (ITLA) — Santo Domingo, DR
Associate Degree in Software Development — *In progress, final term*

SKILLS

Languages and frameworks: JavaScript / TypeScript (React, Vue, Angular, Node.js), Python (Django, Flask, FastAPI), C# and .NET Core, Flutter, PHP, Spring Boot. **Data:** SQL Server, PostgreSQL, MySQL, MongoDB, Firebase.
Engineering: REST and GraphQL, ERP integration, Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins), AWS, Azure, automated testing (Jest, PyTest, xUnit), SOLID and design patterns.
Automation and AI: n8n, Make, OpenAI, computer vision (YOLO, MediaPipe, OpenCV).
Systems and tools: Git, Linux (daily use), Windows Server, Kali Linux.

CERTIFICATIONS

Claude 101, Anthropic
Enterprise Full Stack: Spring Boot 4 and Angular 21, Dev Senior Code
Python and Artificial Intelligence (200 h), Samsung
Dev-Camp: Web Development with AI, Universidad de La Salle
Introduction to Cybersecurity, Cisco Networking Academy
Hacking with Kali Linux, ITLA
Power BI, Santander Open Academy
SQL Intermediate, Sololearn
IT Essentials, Cisco · ITLA
